PHONO CABLE PH-2SX[1.2]

● Nano Sized Micro Particles of Gold & Silver will Transfer the Very Delicate Phono Signal, Smoothly.

◎[PH-2SX] was developed with Nanotec-Systems' original Nano[1/1,000,000mm] sized Micro Particles of Gold & Silver Dispersed Evenly in Natural Oil which will Carry the Very Faint Analog Signal, very Smoothly to the Equalizer.

● PHONO CABLE needs to be Designed with many care for the 0.1mV or alike Faint Voltage Signal to be transferred to the Next Phono Equalizer Amplifier Stage.

We, at Nanotec-Systems, applied our Latest Technology & Ideas on this Phono Cable, [PH-2SX].

Nano Sized Gold & Silver micro-particles work with Oxygen Free Natural Oil to reduce & smoothen the Jamping Electron Distortion, resulting the Original Sound which was picked & reproduced by Phono Cartridge at the Front-end of the Tone Arm. The Air Vibration from the Speakers can vibrate the Phono cable. Our Phono Cable is damped with inside Cotton Strings & Electric-Conductive PVC can reduce the Tapping Noise, effectively. We hope you will enjoy your Analog reproduction life with our latest product, [PH-2SX].

[PHONO CABLE with DIN-XLR PLUG SET]

- model : [PH-2SX(1.2)]
- Conductor : φ0.32mm×7-Strings × OFC(+/-Each)
- Sectional Area : 0.563 ml × 2
- Isolation Materials : PE + Electrically Conductive PVC, Cotton Strings, Heat Resistant PVC(Green) with Black Mesh
- Shield Material : Copper Foil
- Length of the Cable : 1.2m
- Coloidal Liquid : Specially made for #207
